

MICRO-TOUCH® NITRA-TEX®

ALLERGY PREVENTION COMBINED WITH OUTSTANDING BARRIER PROTECTION AND CHEMICAL RESISTANCE

Today, healthcare workers are highly aware of the risk of Type I allergies resulting from exposure to latex.

Made of 100% nitrile, Ansell's MICRO-TOUCH® Nitra-Tex® gloves are latex- and powder-free. Moreover, the 100% thiuram-free formulation and absence of chemicals significantly reduces the risk of Type IV allergies.

Nitrile gloves are stronger than vinyl gloves and most latex gloves. MICRO-TOUCH® Nitra-Tex® has exceptionally good physical properties, as well as a strong resistance level to a large number of chemical products, including cytostatics.

Chlorination of the inner coating of the glove makes donning easy, while the absence of powder considerably reduces the risk of skin abrasion. Micro-textured finger surfaces ensure a good grip on instruments, and the gloves are also suitable for contact with foodstuffs.

The combination of easy donning, high comfort and sure grip make MICRO-TOUCH® Nitra-Tex® and MICRO-TOUCH® Nitra-Tex® EP™ the optimal choice for many healthcare professionals.

At 280 mm, MICRO-TOUCH® Nitra-Tex® EP™ offers additional length for extra protection.

This examination glove, CE Marked as Class I Medical Device, is additionally certified and CE Marked as Category III Personal Protective Equipment, ensuring more consistent quality and providing protection for a wide range of applications.

PRODUCT DESCRIPTION

Material	Nitrile
Colour	Pale Blue
Shape	Ambidextrous
Cuff	Beaded
External Surface	Textured
Internal Surface	Chlorinated

SIZE / PRODUCT CODE

x-small	4479	small	4470
