

## MICRO-TOUCH® AFFINITY®

### A COMBINATION OF ALLERGY PREVENTION AND COMFORT: EVERY HEALTHCARE PROFESSIONAL DESERVES OPTIMAL PROTECTION

MICRO-TOUCH® Affinity® examination gloves are an example of Ansell's ongoing commitment to searching alternatives to natural rubber latex.

Made of neoprene, MICRO-TOUCH® Affinity® is an ideal solution for protecting healthcare workers and patients against Type I allergies. The powder-free design also limits the risk of dermatitis for the wearer.

MICRO-TOUCH® Affinity® offers chemical protection with a comfort level similar to latex. Thanks to its specific neoprene formulation, the MICRO-TOUCH® Affinity® glove has excellent flexibility and stretching qualities.

The glove's textured fingertips provide a secure grip in both dry and wet conditions for enhanced instrument handling.

The neoprene formulation of MICRO-TOUCH® Affinity® provides excellent resistance to a broad range of chemicals, and the dark green colour makes the glove easy to identify.

#### PRODUCT DESCRIPTION

Material	Neoprene
Colour	Green
Shape	Ambidextrous
Cuff	Beaded
External Surface	Smooth with textured fingertips
Internal Surface	Polycrylate coated

#### SIZE / PRODUCT CODE
